Schuitemaker

Schuitemaker offers a wide range of professional agricultural machinery for forage production for the agricultural contractor and modern livestock farmer. Quality and performance define these machines with the Rapide used for harvesting and cutting all types of grass and transporting heavy silage product during maize chopping. The trailing pick up folds entirely against the bottom of the wagon which creates maximum ground clearance. Additionally, compact construction in combination with galvanised and coated board profile makes the body both strong and durable with the placement and style of the axle allowing for optimal weight distribution, which is ideal on hills.

Schuitemaker 55S

The Rapide 55S is the smallest Schuitemaker multi-functional wagons. This Rapide can harvest grass and carry maize and/or grass.

Capacity	27m³
Pick up width	180cm
Knife thickness	6mm
Maximum load tandem axle	18 tonnes

SPECIAL pricing from \$139,900 +gst

Schuitemaker 65S (without beaters)

The Rapide 65S is the largest dual-purpose precision chop loader wagon of the 10 series with a capacity of 32m³. Well designed to handle the conditions New Zealand presents.

Capacity	32m³
Pick up width	180cm
Knife thickness	6mm
Maximum load tandem axle	18 tonnes

Unique suspended floating, trailing pick-up!

Schuitemaker Farmer 58V

The Rapide 58V is a compact design loader wagon with a capacity of 27m³ (or optional 30m³). Set-up for zero grazing with rear conveyor, ideal for the goat farmer.

Capacity	27m³ (or optional 30m³)
Pick up width	180cm
Knife thickness	6mm
Maximum load tandem axle	14 tonnes

Priced from \$160,000 +gst

 Keeping Agriculture Moving

Built as the name suggests, the **HiSpec** range are big on quality and big on toughness. Built in Ireland, **HiSpec** is well known throughout the world for building tough and innovative machines for the agricultural industry.

HiSpec Side Spreader

Designed to handle a wide range of manure from solid to slurry, the HiSpec Side Spreader is one of the leading side spreaders on the market today. Once in operation the Side Spreader unloads fast and gives an even, consistent spread pattern across land. HiSpec Side Spreaders are currently available in two models, sizes **800 = 7.5 cu/m** and **1000 = 9.5 cu/m**.

- Two pack, high quality paint finish ensures a machine that will last.

HiSpec XCEL 1250

The redesigned XCEL 1250 retains the patented and proven chain flail and spinning disc spreading system and has been refined to improve both the **spread pattern and adjustability**. The spreading system can handle a number of different materials including farmyard manure, chicken manure, compost and sludge cake.

- Built tough to handle harsh NZ conditions, ideal contractors machine, handles all materials.

Priced from **\$19,900 +gst**

IRISH tough for NZ conditions

HiSpec Slurry Tanker

Thoughtful design and superior build quality put the HiSpec range of Vacuum Tankers in a class of their own. All tankers from 3600 litres to 13,500 litres use a unique low profile spreading system. The downward directed plate not only increases controllability, but also decreases air pollution and unpleasant smells.

- Standard axle tankers or recessed axle tankers

Special

Priced from **\$32,900 +gst**

HiSpec 3500 TD-S Tanker

TD-S tandem tankers offer greater carrying capacities than single axle tankers. **15,750 litres, for farmers and contractors looking for greater efficiency.** TD-S tankers are fitted as standard with a swivel hitch, sprung drawbar and a high speed commercial tandem axle for operator comfort. TD-S tankers also offer a fully supported barrel unique to HiSpec and reinforced baffle plates internally prevent slurry surge, all which ensures a completely smooth ride.

Solid chassis & axle system

HiSpec Diet Feeder V14

The V series vertical augers are a range of feeders from 7m³ to 16m³ with a single auger. A single discharge door is standard. An independent reinforced chassis and a single axle provide a solid base for the feeder body. There is a choice of tyre options to vary either the loading or feed out height. The independent chassis features four Digi-Star weigh-cells are standard; one on each corner; and these weigh-cells provide an extremely accurate indicator of feed weight. **Great maneuverability in a feed lot!**

HiSpec Diet Feeder T24

Vertical auger feeders ranging in size from 14m³ to 35m³ with two vertical augers. A single discharge door is standard. The larger capacity T Series can produce feed loads for 98 – 280 cows (140 – 350 cattle). The T Series is built with the same strength in depth as all HiSpec machines. The heavy duty 20mm floor is complete with unique vertical reinforcement as standard across the T Series. **The T Series is ideal for operators where higher work rates and large capacity mixes are required.**

SUMO

Designed and built by some of the country's finest and most highly-skilled engineers, **Sumo** machines are made to last. **Sumo** has a longstanding reputation for supplying heavy duty, well-made products.

Sumo GLS Subsoiler

The GLS improves and revitalises compacted grassland, and leaves the paddock tidy and ready for grazing quickly.

Priced from **\$29,650** +gst

Sumo Mixidisc

High-speed multipurpose cultivator for tilling, levelling and incorporating large volumes of crop residue, complete with hydraulic leveling paddles.

SUMO Market leader in cultivation

Sumo Trio

The UK's #1 one-pass soil cultivator. A cost-effective solution for New Zealand farmers and contractors. The mounted and trailed Trio cultivators are a great tool for farmers and contractors primarily as they help alleviate subsurface compaction and mix residue and soil to leave a level surface that is ready for seeding,

Sumo Quatro

The ultimate primary cultivation tool consists of four elements that can be easily adjusted to suit all soil conditions. The Quatro is considered the crown jewel in its range of minimum tillage cultivators. It combines discs, tines and rollers to handle a variety of conditions and boasts a number of original features that Sumo has developed.

DALBO

6 year guarantee on Snowflake® rings.

Craftsmanship, ingenuity, and decades of experience join forces to produce agricultural machinery of outstanding quality. Since 1948, **Dal-bo** has supplied farmers with the best possible tools for soil preparation.

MiniMax (Spring down pressure)

The MiniMax is an all-round roller which can be used for different purposes. Rolling pre and post sowing and rolling of winter drilled crops can all be done with the same roller. MiniMax is also ideal as a machine to tow behind stubble or seedbed implements to use as a levelling and consolidation tool. **Seeder and leveling options available.**

Priced from **\$27,900** +gst

MaxiRoll (Hydraulic down pressure)

#1 Selling roller in the UK. 60mm CRMO4v-steel shafts with rubber suspended bearings. Hydraulic cracker board with parallelogram eliminates lumping in fields. Hydraulic weight distribution system provides 100% even compaction of soil. Comes in working widths from 5.3m – 12.3m. 6-year guarantee on Snowflake® rings. **Seeder options available.**

Heavy-duty hydraulic down pressure roller

Rollomaximum

The high-capacity Rollomaximum is a precise seedbed cultivator with built-in front and rear rollers. The combination of rollers and cultivator tines regularly achieves from ploughing a seedbed in a single pass. Comes in working widths from 6.2m – 12.4m.

Secondary cultivation

TOUGH **HARDOX** TINES

PRODIG

High quality front end loaders, that are robust, reliable and easy to maintain, giving many years of service. They are designed with efficiency and productivity for the end user in mind. **STRENGTH, DESIGN and INNOVATION.**

ProDig Shear Genius

The ultimate attachment for the farmer who diet feeds. This unit is a shear grab, bale splitter with plastic/net retainer and loading bucket all in one unit. This unit reduces feed waste by up to 15% and feeding time by up to 30%, making farmers more efficient and increasing profits.

Priced from **\$10,900** +gst

ProDig Folding Grass Fork

The ProDig Folding Grass Fork is designed to handle the increased output from a new generation of high capacity silage harvesters. Our fork is designed to withstand the rigorous demands of today's busy contractor with clever designs to reduce down time. **12, 14 and 16 foot.**

Priced from **\$18,900** +gst

ProDig Push Off Forks

Designed to quickly & efficiently handle high volumes of grass silage on Large Hp Tractors and can be used on Tele-Handlers/Wheeled Loaders.

Priced from **\$17,900** +gst

ProDig Tine Grabs

The tractor Tine Grab is an extremely versatile heavy duty, robust attachment which can be used for a wide variety of applications, in the Agri sector.
